

The Max-Planck-Institut für Eisenforschung GmbH in Düsseldorf (Germany) invites applications in the fields of

**Physical Metallurgy; Materials Science; or Metal Physics**

at all levels (PostDoc, PhD candidate, Diplom, Master or equivalent).

The project is part of a close cooperation on soft magnetic Fe-Si steels with a worldwide leading company in that field. In case of a successful performance the possibility of company employment will be considered at a later stage of the project.

Candidates should have an excellent theoretical background in the fields of physical metallurgy (in particular grain growth, recrystallization, interfaces, plasticity, crystallographic textures, precipitations, steels). Experience in electron microscopy (SEM, TEM, EBSD) and X-ray Bragg diffraction techniques is highly appreciated.

We encourage highly motivated candidates who are interested in both, applied and basic research to apply. Excellent knowledge in English is required. Additional knowledge in either German or French is welcome.

We are an equal-opportunity employer.  
We invite candidates to send their complete CV in pdf format via email as soon as possible to
